DETAILED ACTION

Continuing-Data Objection

The continuing data appearing at page 1, lines 4-7, is objected to because it improperly identifies the present application as a "divisional" of pending US patent application No. 09/975,230 (hereinafter referred to as the "parent application"). Note that there was no restriction required in parent application No. 09/975,230 between the method claims 1-13 of the present application and those apparatus claims pending in the parent application. Thus it is not seen how the present application can be a "divisional" of Serial No. 09/975,230. The change of "divisional" (page 1, line 4) to -- continuation -- would obviate this objection.

Specification Objection

The specification is objected to because of the following informalities:

1. The misspelling of "or" (page 5, line 3) should be corrected.
2. The misspelling of "the" (page 5, line 19) should be corrected.

Drawing Objection

Figure 1 is objected to because a single reference numeral "4" is used for the bottom wall and the support. No single reference numeral can be used for two different structures [see MPEP section 608.01(g)]. Correction is required.

Claim Objections

Claims 1-13 are objected to because of the following informalities:

1. The phrase "having said food molded in the tray, for obtaining" recited in claim 1, line 23, claim 4, line 18, claim 7, line 19, and claim 11, line 15 should be changed to read -- molding said food in the tray to obtain --.
2. In claim 4, line 9, the comma is superfluous and it should be deleted.

***PROVISIONAL REJECTION, OBVIOUSNESS
TYPE DOUBLE PATENTING***

Claims 1-13 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 40-43 of copending Application No. 09/975,230. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instantly claimed method for obtaining a molded food product is the obvious function of the molding apparatus as claimed in claims 40-43 of the copending application, Serial No. 09/975,230.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Prior Art Citation

The Akutagawa et al patent is cited to show a method for producing molded chocolate products. The Dana patent is cited to show a method of molding candy in plastic molds.

Allowable Subject Matter

Claims 1-13 are free of the prior art. Claims 1-13 would be allowable if amended to overcome the objections set forth in this Office action and if the provisional obviousness-type double patenting rejection is obviated.
